

Monitoring box allowing the control and the wiring of 2 NAVILITE 48VDC beacons, operating at night only or continuously, plugged to work simultaneously or in redundancy (a main light and a backup light working only in case the main light is not working) with remote

- Control 1 or 2 NAVILITE 48VDC either
  - with an active redundancy (one main lamp and one back-up lamp switched on in case of failure of the main lamp)
  - or a simultaneous operation of 2 lights
- Control the day/night switching of the lights
- Allow remote monitoring in case of lamp failure or power supply failure by potential free contact
