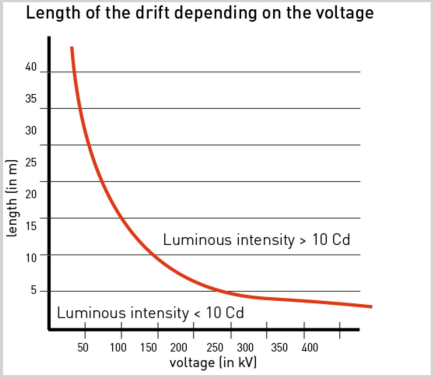
BAL-225-Ø32-52 [P/N: 100905B]

Obstruction lighting system for high voltage lines, red fixed low intensity

- suitable for high voltage from 60KV to 400KV with fixing accessories and capacitive elements with a cable
- clamp adapted to the diameter of the cable
- BALISOR® lamp B33 P/N100616 with interference suppression included
- red fixed color with light intensity higher than 10 candelas

The power supply by capacitive effect ensures a constant light intensity whatever is the value of the electric current crossing the line



Electrical Characteristics	
Power source	Autonomous by capacitive effect
Mechanical Characteristics	
Cable diameter	Ø32-52mm
Attachment	Aluminium clamps
Photometric Characteristics	
Luminous intensity	> 10 Cd
Standards	
Standards compliance	ICAO Aerodrome Design Manual Part 4 chapter 14
