

Obstruction lighting system for high voltage lines, red fixed low intensity

- * suitable for high voltage from 60KV to 400KV with fixing accessories and capacitive elements with a cable
- > clamp adapted to the diameter of the cable
- ▶ BALISOR® lamp B33 P/N100616 with interference suppression included
- 🗲 red fixed color with light intensity higher than 10 candelas

The power supply by capacitive effect ensures a constant light intensity whatever is the value of the electric current crossing the line
